Gary Carciello

I start to play gtr in a age of ten...(i'm 45 now)My friend play me some vinyl records...those same bands are still my favorites,old school stuff...Led Zeppelin,Rush,Jimi Hendrix,Black Sabbath,Lynyrd Skynyrd,Deep Purple...etc.First school bands were couple of years later...later i move into big city and got a job from local funk rock band Generators .They got already record deal and gigs around the country in good venues...things go pretty well in radio and my father and mother take my playing hobby more serious when they see me playing in TV. Few years later i left band and focused more into spiritual things in life.I start to make music in my home,using tape recorders...drum machine and bass.It was great time.
I learn to play all instruments in that period and i check all kind of music.
About ten years later i start to do things professionally...playin several cover bands,i start to teach kids to play and buy more recording gear.Today my work includes mixing gig's, recording and teaching.
In ten years i have done lot's of songs and cover gigs...2007 came this internet music thing.It has give me whole new dimension of making music.
Finally i start to use PC in recording.Learning curve was pretty hard.Rayon Vert has been big part of my music life lately.Still,i make own things too with Doctor C and other friends...basically i am still blues based rock player who wants to try found new dimensions of makin music.

Gary C
